

## T4K Quad-Core Intelligent Keychain Light

- Multifunctional OLED Real-Time Display
- Advanced Power Cut-Off (APC) Technology
- USB-C Rechargeable

**Q&A**

Q: Why does my T4K shut down in 30 seconds?  
A: The T4K has 2 user modes, DEMO Mode and DAILY Mode. The default setting is DEMO Mode where the product will automatically shut down if there is no operation in 30 seconds. It is recommended to switch it to DAILY Mode when in daily use.

Please follow the steps below for mode switching:  
1. When the light is on/off, long press both the Power Button and the Mode Button simultaneously to switch between DEMO and DAILY Mode.  
2. The LEDs will flash to indicate the current user mode: 1 flash to indicate DEMO Mode and 2 flashes to indicate DAILY Mode.

## Features

Utilizes 4 x CREE XP-L V6 LEDs with a max output of 4,000 lumens  
Max peak beam intensity of 10,900cd and max throw of 209 meters  
Utilizes a total reflective optic system for uniform and soft light  
Multifunctional OLED real-time display for lumens, battery voltage, runtime etc.  
Built-in 1,000mAh Li-ion battery  
Advanced Power Cut-Off (APC) technology for an ultra-low standby power consumption  
Built-in Li-ion battery charging circuit with a USB-C port  
Highly efficient constant current circuit provides a stable output up to 67 hours  
2 user modes available (DEMO Mode and DAILY Mode)  
Dual side switch design  
5 brightness levels available with direct access to TURBO  
Intelligent mode memory function  
Front facing camera (Half Lockout Mode and Full Lockout Mode)  
Incorporated Advanced Temperature Regulation (ATR) module (Patent No. ZL201510534543.6)  
Metal ring pull able to withstand up to 30 kilograms of weight  
HA III hard-anodized finish  
Impact resistant to 1 meter

## Specifications

Dimensions: 82.3mm×30mm×29.2mm  
(3.24"×1.18"×1.15") (Clip Included)

Weight: 77g (2.7oz) (Clip Included)

## Accessories

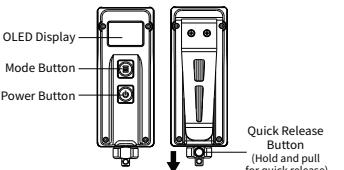

USB-C Charging Cable, Key Clasp

## Technical Data

	TURBO	HIGH	MID	LOW	ULTRALOW
Brightness	4,000 Lumens	200 Lumens	65 Lumens	15 Lumens	1 Lumen
Runtime	-	2h 45min	7h	21h	67h
Beam Distance	209m	45m	24m	13m	3m
Peak Beam Intensity	10,900cd	520cd	140cd	43cd	3cd
Impact Resistance	1m (Impact Resistance)				
Water Resistance	IP54				

Note: The stated data is measured using the built-in Li-ion battery (1,000mAh) under laboratory conditions. The data may vary in real world use due to different battery usage or environmental conditions.

## Operating Instructions

## Charging Function

## (English)

### Operating Instructions

**Multifunctional OLED Display**  
The T4K is equipped with a multifunctional OLED display. (Please remove the screen protective film for the first use.) When the light is turned on, the screen will successively show the current info (Brightness Level & Lumens, Runtime Remaining, User Mode) before it goes out. After the screen goes out, short pressing the Mode Button can reactivate the screen.

### Display Demonstration Function

- This function is used for demonstration ONLY. It does not reflect the actual light status.
- When the light is off, keep holding the Power Button even after ULTRALOW is accessed until the light is turned off to enter the display demonstration.
- In this status, the screen will cycle through various informational displays. Short press either button to exit this status.

### On / Off

On: When the light is off, short press the Power Button to turn it on. Off: When the light is on, short press the Power Button to turn it off.

### User Modes

The T4K has 2 user modes, DEMO Mode and DAILY Mode. DEMO Mode: The light will automatically shut down if there is no operation in 30 seconds (reactivating the screen excluded). The countdown will be displayed on the screen.

DAILY Mode: The light will not automatically shut down and will need to be shut down manually. Note: The default setting is DEMO Mode. It is recommended to switch it to DAILY Mode when in daily use.

### Mode Switching

When the light is on/off, long press both the Power Button and the Mode Button simultaneously to switch between DEMO and DAILY Mode. The LEDs will flash to indicate the current user mode: 1 flash to indicate DEMO Mode and 2 flashes to indicate DAILY Mode. (In this process, the screen will show "DEMO" or "DAILY" to indicate the current user mode.)

Note: Reactivating the light within 3 seconds after it automatically shuts down in DEMO mode will temporarily access DAILY Mode until it is turned off.

### Brightness Levels

When the light and the screen is on, short press the Mode Button to cycle through the following brightness levels: ULTRALOW – LOW – MID – HIGH. The flashlight will directly access the previously memorized brightness level when reactivated.

Note: When the screen is off, short press the Mode Button to activate the screen before adjusting the brightness level.

### Direct Access to ULTRALOW

When the light is on/off, long press the Power Button to directly access ULTRALOW.

### Direct Access to TURBO

When the light is on/off, press and hold the Mode Button to access TURBO. Release to return to the previous status.

### Note:

1. When activating TURBO, a countdown progress bar will be shown on the display to indicate the activation time for TURBO after showing the current brightness level and lumens.

2. If continuing to hold the Mode Button after the progress bar is displayed, the light will access HIGH Level instead and the display will turn off.

3. The activation time for TURBO depends on the thermal status of the flashlight. The higher the temperature the faster it gets, shorter the activation time for TURBO when it is reactivated.

4. Use caution when operating the light in TURBO to avoid overheating and step down to a lower level if the light becomes too hot to handle.

### Lockout / Unlock

1 (Half Lockout Mode) 2 (Full Lockout Mode)  
The T4K has two lockout modes (Half Lockout Mode and Full Lockout Mode).

#### Half Lockout Mode (Lockout 1):

- When the light is on, press and hold the Power Button until the screen shows the Lockout 1 icon. The light will turn off and access Half Lockout Mode.
- When in Half Lockout Mode, the Power Button is unavailable to activate the flashlight. Holding the Mode Button is still available for accessing Half Lockout Mode.

#### Full Lockout Mode (Lockout 2):

- When the light is on, keep holding the Power Button even after accessing Half Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Full Lockout Mode.
- When in Full Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Unlock (Lockout 2):

- When the light is on, holding the Power Button even after accessing Half Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Full Lockout Mode.
- When in Full Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Half Lockout Mode (Lockout 2):

- When the light is on, keep holding the Power Button even after accessing Half Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Full Lockout Mode.
- When in Full Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Lockout (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Unlock (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Half Lockout Mode (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Full Lockout Mode (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Lockout (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Unlock (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Half Lockout Mode (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Full Lockout Mode (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Lockout (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Unlock (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Half Lockout Mode (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Full Lockout Mode (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Lockout (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Unlock (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Half Lockout Mode (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Full Lockout Mode (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Lockout (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Unlock (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Half Lockout Mode (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Full Lockout Mode (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Lockout (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Unlock (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Half Lockout Mode (Lockout 1):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 1 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.

#### Full Lockout Mode (Lockout 2):

- When the light is on, holding the Power Button even after accessing Lockout Mode until the screen shows Lockout 2 icon. The light will turn off and access Lockout Mode.
- When in Lockout Mode, both buttons are unavailable to activate the flashlight.
